LOS ANGELES MAY 19-23, 2014

INTERNATIONAL SYMPOSIUM ON ARCHAEOMETRY

The upcoming International Symposium on Archaeometry will be a valuable opportunity to apply and demonstrate the latest findings of archaeometric research on a broad range of topics across time and space. The symposium will draw on examples and best practice from interdisciplinary research at the interface between the natural sciences, engineering, and archaeology.

The ISA 2014 in Los Angeles will bring together internationally renowned archaeological scientists and archaeologists with museum professionals, conservation scientists, policy-makers, representative of non-governmental organizations and industry, natural scientists, engineers, and other interested groups. The symposium will present new findings and innovations in technology and scientific research, and address current and global challenges in archaeology and cultural property, ranging from the looting and illicit trafficking of antiquities to the archaeology of transitional periods.
