General characteristics of archaeological sites and its lithic assemblages included in TET project

Rajna Šošić Klindžić
Department of Archaeology
Faculty of Humanities and Social Sciences
University of Zagreb

"Archaeometrical research of lithic raw materials for early Neolithic prehistoric communities with the help of Prompt Gamma Activation Analysis, with special regard to radiolarites and obsidian", project closing meeting

Budapest, 29.10.2009.

Silex samples
Obsidian samples
Zadubravlje

- 15 km east of Slavonski Brod
- 1989-1990 (Zagreb-Belgrade motorway)
- Starčevo culture site
- 6200 m²
- C14 dates 5970-5040 cal BC; oldest date originates from a well
- Features with “workshop assemblages” 5930-5530 cal BC
- Workshop assemblage in 4 features (N = 500+)

Fig. 1: Zadubravlje; central part of the settlement – residential pithouses 6 and 10 with fenced yards and workplace pithouse 9 with pottery and bread ovens (reconstruction by E. Münchwe- ter, drawing by M. Gregl)
Galovo

- Slavonski Brod
- Brickyard, partially destroyed
- Excavations since 1997. (2500 m² so far)
- Starčevo culture
- Huge time span
- Somewhat controversial dates (and/or interpretation)

6070-4960 cal BC
Galovo

- Workshop assemblage in 3 features
- Burials in 2 features
- Chipped stone assemblage not connected with the burial or ritual

Cernička Šagovina

- Late 1970s
- 50 m²
- 3 features (pits) of undefined purpose
- Late starčevo
- Lithic assemblage N = 41
**Đakovo - Ivandvor**

- Vc corridore
- Starčevo – late
- Dark painting and barbotine
- Dwelling and working pits
- Construction elements

- Lithic assemblage
  
  N=56

Leleković 2008

**Đakovo - Tomašanci**

- Vc corridore
- Starčevo – late
- Dark painting and barbotine
- Dwelling and working pits
- Construction elements

- Lithic assemblage
  
  N=56

Balen 2007
Virovitica-Brekinja

- 5400 m²
- 312 chipped stone artifacts
- 1 dwelling pit
- Other still undefined
- No workshop activity in the investigated part of the site

Starčevo culture lithic assemblages – general characteristics

- Industry based on blades
- Simple retouched tools and endscrapers
- Trapezes – not many, but present

- Resembles early phases of Anzabegovo, Divostin and Golokut
Provenance of raw material

- Bosnian mountains
- Pebbles collected from the river beds (Sava, Drava) in small quantities
- Szentgal radiolarite in Zadubravlje

Absence of:
- Long blades
- “Balkan flint”
Obsidian finds

Bapska

Burić 2008
Obre I

- Place of contact of two early Neolithic populations – early phase – starčevo and impresso cultures = starčevo/impresso
- Early/middle Neolithic - discussion
- Later phase – kakanj culture

Okolište

- Butmir culture site
- Late Neolithic

Hofmann et al. 2009
Gornja Tuzla

- Starčevo culture
- Vinča culture
- Bubanj culture

- Starčevo horizon similar and simultaneous with Obre I
