

# *General characteristics of archaeological sites and its lithic assemblages included in TET project*

Rajna Šošić Klindžić  
Department of Archaeology  
Faculty of Humanities and Social Sciences  
University of Zagreb

"Archaeometrical research of lithic raw materials for early Neolithic prehistoric communities with the help of Prompt Gamma Activation Analysis, with special regard to radiolarites and obsidian"; project closing meeting

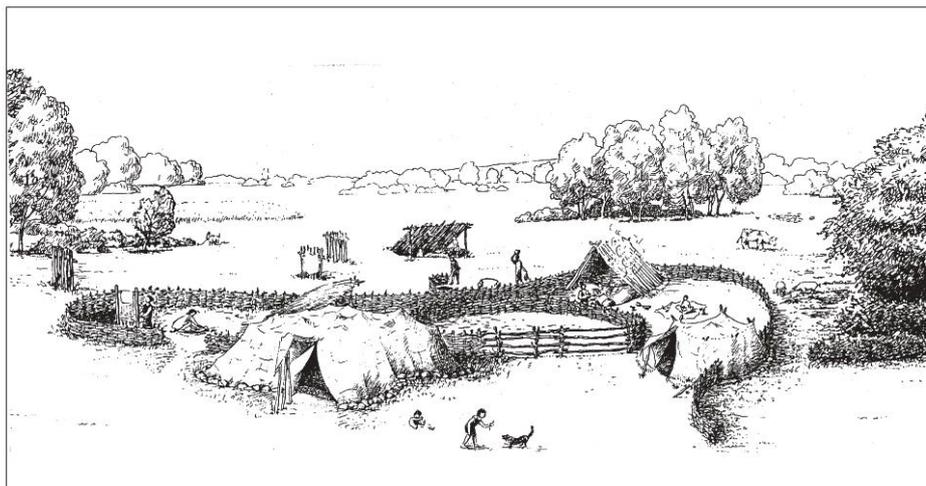

Budapest,  
29.10.2009.

# Zadubravljje

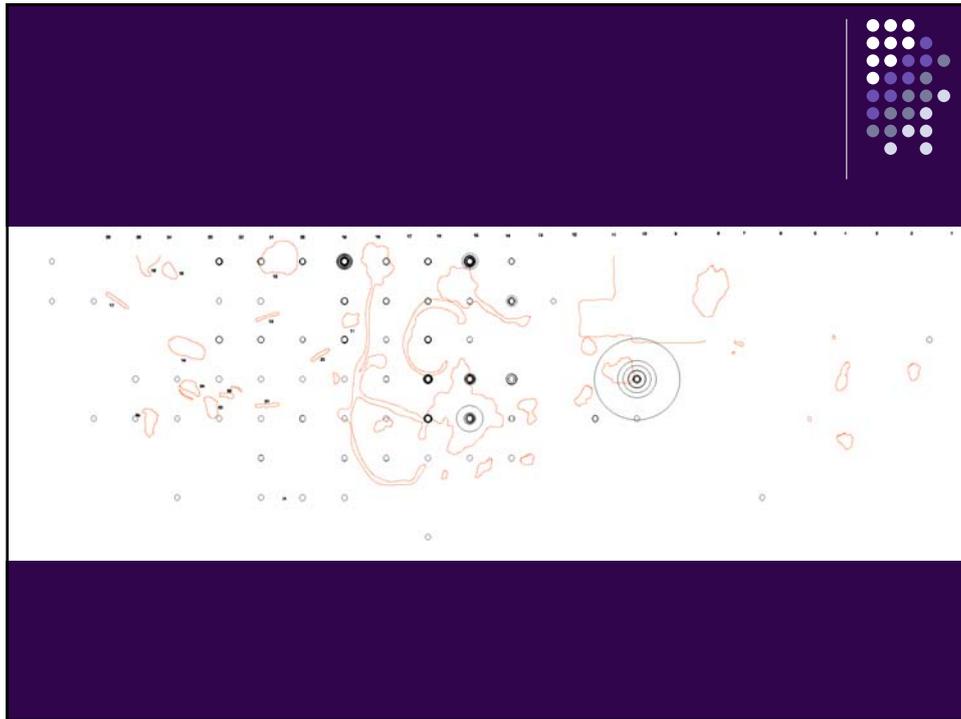

- 15 km east of Slavonski Brod
- 1989-1990 (Zagreb-Belgrade motorway)
- Starčevo culture site
- 6200 m<sup>2</sup>
- C14 dates 5970-5040 cal BC; oldest date originates from a well
- Features with “workshop assemblages” 5930-5530 cal BC
- Workshop assemblage in 4 features (N = 500+)

Sl. 1 Zadubravljje: središnji dio naselja – stambene zemunice 6 i 10 s ogradenim dvorištima i radna zemunica 9 s lončarskim i krušnim pećima (rekonstrukcija K. Minichreiter, crtež M. Gregl)

Fig. 1 Zadubravljje: central part of the settlement – residential pit houses 6 and 10 with fenced yards and workplace pit house 9 with pottery and bread ovens (reconstruction by K. Minichreiter, drawing by M. Gregl)

## Galovo

- Slavonski Brod
- Brickyard, partially destroyed
- Excavations since 1997. (2500 m<sup>2</sup> so far)
- Starčevo culture
- Huge time span
- Somewhat controversial dates (and/or interpretation)

6070-4960 cal BC ←

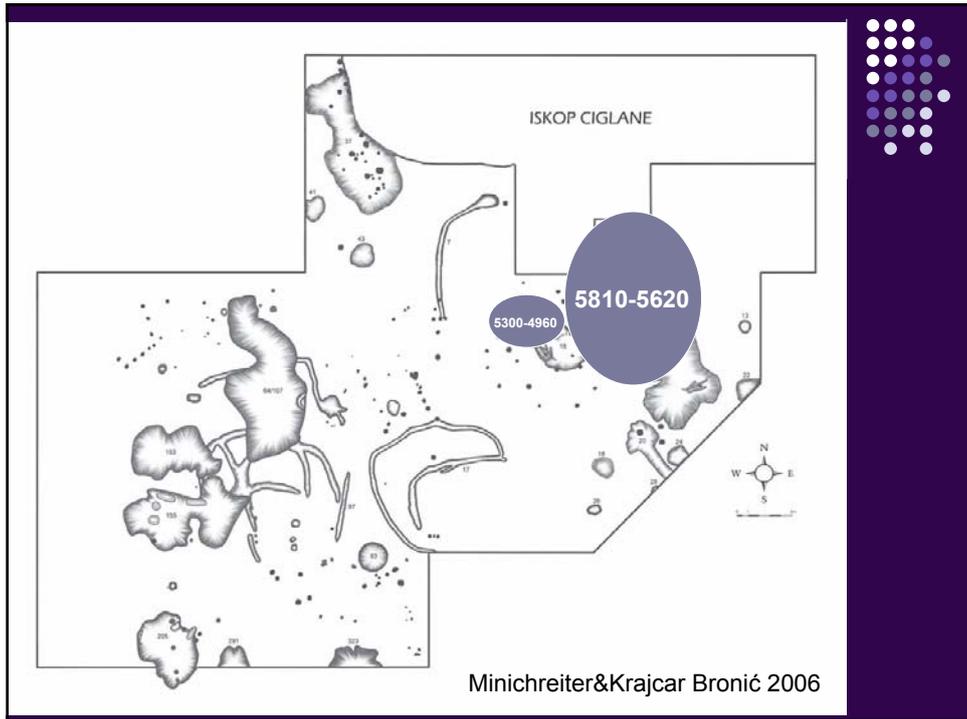

Minichreiter 1999

Minichreiter 2007

Minichreiter 1999

## Galovo

- Workshop assemblage in 3 features
- Burials in 2 features
- Chipped stone assemblage not connected with the burial or ritual

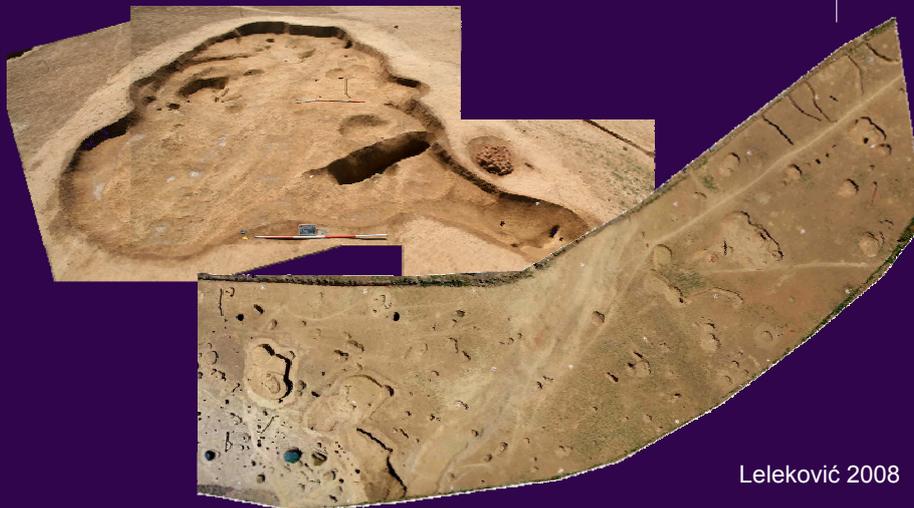

## Cernička Šagovina

- Late 1970s
- 50 m<sup>2</sup>
- 3 features (pits) of undefined purpose
- Late starčevo
- Lithic assemblage N = 41

## Đakovo - Ivandvor

Leleković 2008

## Đakovo - Tomašanci

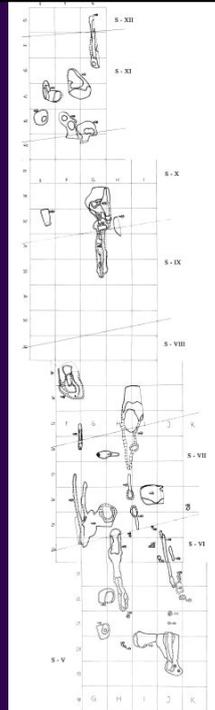

- Vc corridore
- Starčevo – late
- Dark painting and barbotine
- Dwelling and working pits
- Construction elements
  
- Lithic assemblage  
N=56

Balen 2007

## Virovitica-Brekinja

- 5400 m<sup>2</sup>
- 312 chipped stone artifacts
- 1 dwelling pit
- Other still undefined
- No workshop activity in the investigated part of the site

## Starčevo culture lithic assemblages – general characteristics

- Industry based on blades
- Simple retouched tools and endscrapers
- Trapezes – not many, but present
- Resembles early phases of Anzabegovo, Divostin and Golokut

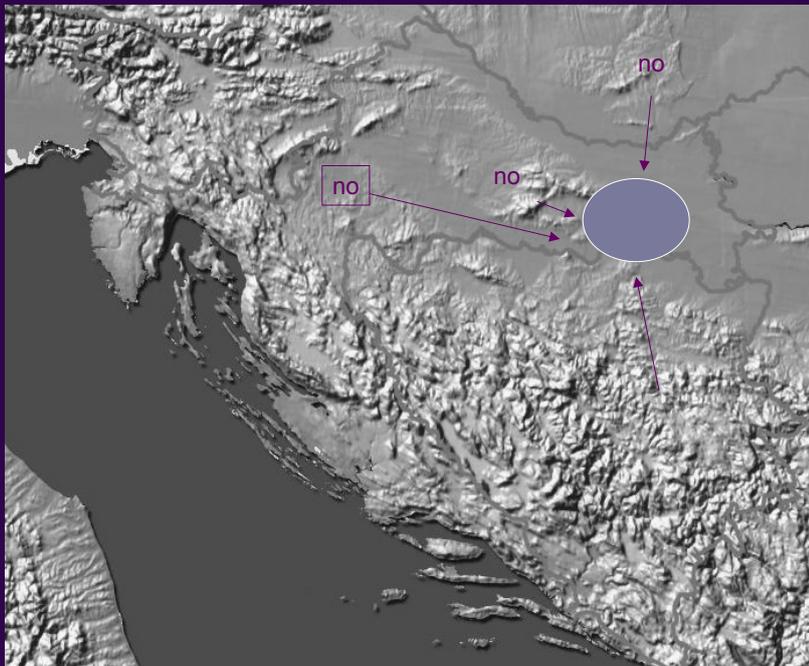

## Provenance of raw material

- Bosnian mountains
- Pebbels collected from the river beds (Sava, Drava) in small quantities
- Szentgal radiolarite in Zadubravlje

### Absence of:

- Long blades
- “Balkan flint”

# Obsidian finds

## Bapska

Burić 2008

## Obre I

- Place of contact of two early Neolithic populations – early phase – starčevo and impresso cultures =starčevo/impresso
- Early/middle Neolithic - discussion
- Later phase – kakanj culture

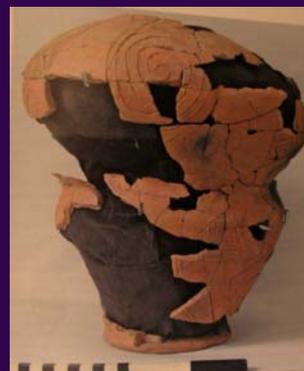

## Okolište

- Butmir culture site
- Late Neolithic

Hofmann et al. 2009

## Gornja Tuzla

- Starčevo culture
  - Vinča culture
  - Bubanj culture
- 
- Starčevo horizon similar and simultaneous with Obre I
